

WEIGHTIT AT THE PORT OF MONTREAL

Weightit provides weight verification certificates to comply with SOLAS legislation.

info@weightit.ca

 Weightit.ca

Weightit is conveniently located at the Port of Montreal truck entrance. This makes it the perfect candidate for supplying VGM weight certificates without having the transport companies driving out of route to have the containers scaled.

The design of the scale enables us to obtain the gross weight of the container without having to factor in the weight of the truck and chassis. There is no need to perform calculations. The advanced design of the scale allows us to lift the container and get the gross weight. The cargo weight is determined at the same time as we enter the tare weight of the container at the time of weighing.

Scale receipts are emailed to the customer within minutes of the actual scaling of the container.
